About Process Director technical specifications

Process Director is an SAP AddOn that is installed in an existing SAP system landscape. It does not require any additional hardware, storage space or software. A web application and a mobile application are optional parts of the solution.

The Java services for the web application and the mobile application connection can be installed on existing SAP servers or on a separate Java server. The requirements are listed for this scenario.

System architecture

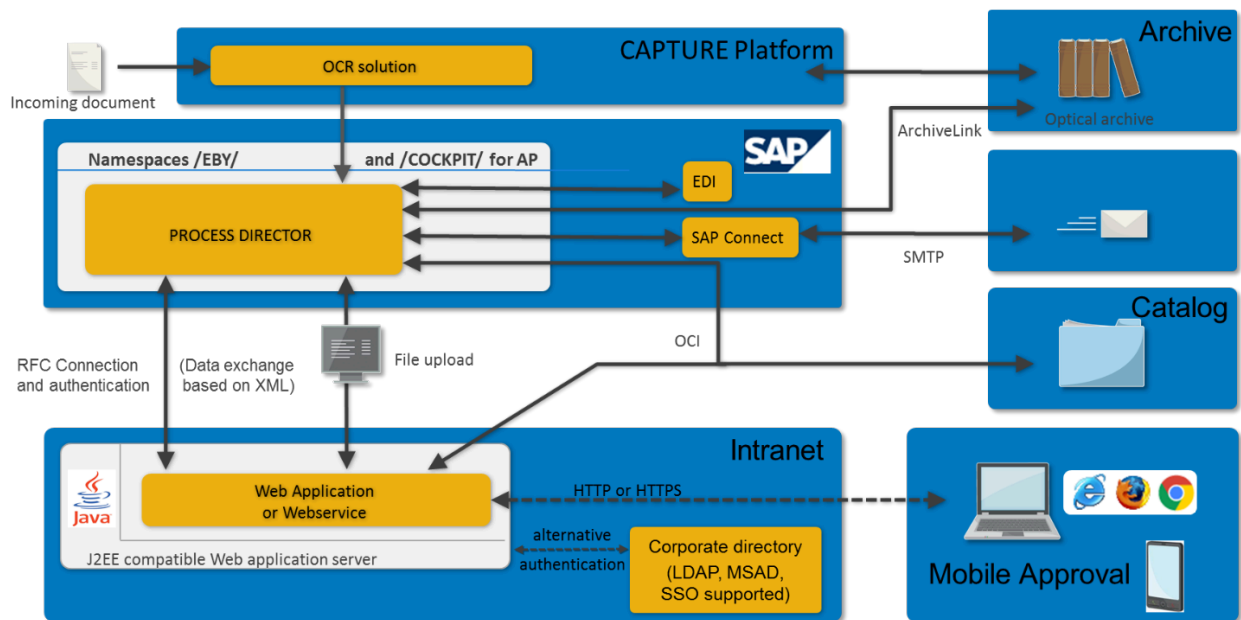

Image 1: Process Director, Desktop Web application & Mobile Approval application

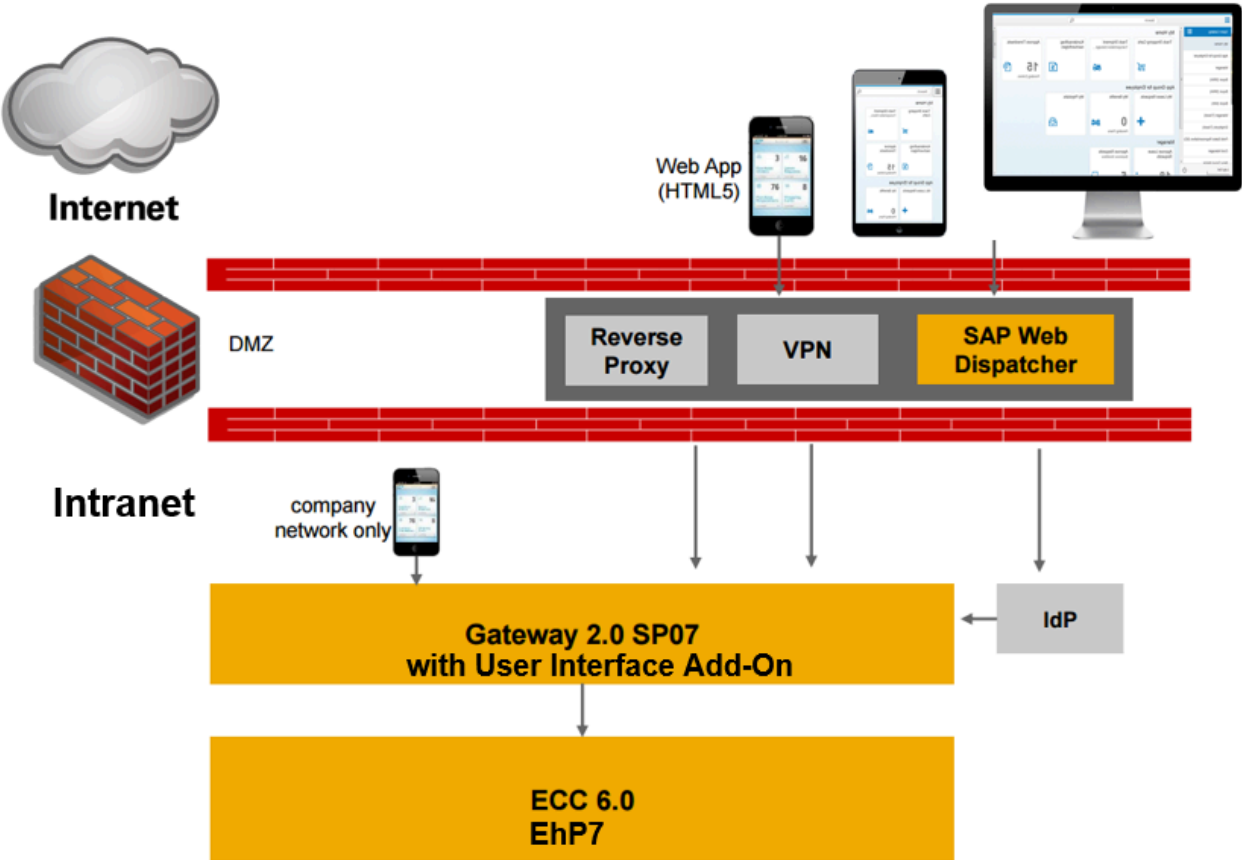

Image 2: Process Director for use with SAP Fiori® Approval application

Product requirements

Process Director, desktop Web Application & Email-based Approval mobile application

Specification	Description
Hardware	Leverages the existing SAP system landscape. No special requirements
Accessibility	Standard business network connectivity
Browser	Internet Explorer, version 11 Microsoft Edge Mozilla Firefox, version 3 and higher Safari, version 4 and higher Google Chrome
SAP Releases	Supported SAP ERP releases: ECC 6.0 ECC 6.0 EhP 1 ECC 6.0 EhP 2 ECC 6.0 EhP 3 ECC 6.0 EhP 4 ECC 6.0 EhP 5 ECC 6.0 EhP 6 ECC 6.0 EhP 7 ECC 6.0 EhP 8 S/4HANA 1511 (on premise or private cloud) S/4HANA 1610 (on premise or private cloud) S/4HANA 1709 (on premise or private cloud) S/4HANA 1809 (on premise or private cloud) S/4HANA 1909 (on premise or private cloud) S/4HANA 2020 (on premise or private cloud)
Mobile Operating Systems	iOS and Android. For the Email-based Approval application.
Client Operating Systems	No limitations. SAP GUI or browser must be supported.
Server Operating Systems	Leverages the SAP system (all SAP supported OS)
Web Servers/Web Application Servers	SAP NetWeaver can be used. Optionally, any Java EE Web Application Server can be used.
DBMS	Leverages the SAP system (no additional DB required)

Specification	Description
Required Third Party Technologies	None, an Archive Link compliant archive repository is recommended
Compatible Third Party Technologies	Supports various SAP standard interfaces (Archive Link, SAP Connect, Ariba, Ariba CIG, OCI)
Required Kofax Software	None
Compatible Kofax Software	ReadSoft Invoices, ReadSoft Online, AP Agility
Languages supported	Czech Simplified Chinese Danish Dutch English Finnish French German Hungarian Italian Japanese Norwegian Polish Portuguese Romanian Russian Slovakian Slovenian Spanish Swedish Turkish

Process Director Web Application if not installed on SAP NetWeaver

https://docshield.kofax.com/RSPD/en_US/7.9/print/KofaxProcessDirectorWebApplicationTechnicalSpecifications_en.pdf

Specification	Description
Hardware	Sufficient RAM is required. Each concurrent user session should have 30 MB of memory.
Accessibility	Standard business network connectivity

Specification	Description
Browser	Internet Explorer, version 11 Microsoft Edge Mozilla Firefox, version 3 and higher Safari, version 4 and higher Google Chrome
Client Operating Systems	No limitations. Browser must be supported.
Server Operating Systems	Leverages the SAP system (all SAP supported OS) and all OS that the Java EE Web Application Server supports
Web Servers/Web Application Servers	SAP NetWeaver can be used. Optionally, any Java EE Web Application Server can be used.
DBMS	None required
Required Third Party Technologies	None, an Archive Link compliant archive repository is recommended
Compatible Third Party Technologies	Adobe Acrobat Reader
Required Kofax Software	None
Compatible Kofax Software	
Languages supported	Czech Simplified Chinese Danish Dutch English Finnish French German Hungarian Italian Japanese Norwegian Polish Portuguese Romanian Russian Slovakian Slovenian Spanish Swedish Turkish

Process Director for use with SAP Fiori® using SAP Standard runtime environment

Specification	Description
Hardware	Leverages the existing SAP system landscape, for example, SAP ECC 6.0 EhP7. No special requirements other than that the SAP User-Interface Add-On for Fiori must be installed.
Accessibility	Standard business network connectivity. For access through the Internet the SAP Web Dispatcher or Customer specific VPN or Reverse Proxy can be used.
