Chapter 1

About Kofax SignDoc technical specifications

Kofax SignDoc is an enterprise level e-signature product family, which may either be utilized as part of an integration, or as a standalone application. Due to its integration options, it provides a starting point for any digital transformation initiative, and provides a broad range of e-signing capabilities. Kofax SignDoc supports all signing scenarios in any location (in-branch, in-store, in-office, in-field, at home), assisted, or non-assisted as self-service.

The technical specifications in this document are specific to the following components of SignDoc 2.2:

- SignDoc Standard 2.2.0
- SignDoc Web 2.2.0
- SignDoc SDK 4.3.1
- SignAlyze 1.8.0
- SignDoc Device Support 2.0.1

This document lists the required amount of memory and disk space. You must meet these requirements to support your SignDoc system. These requirements specifically relate to SignDoc and do not include any amount of memory or disk space you require for the operating system, environment, or other software that runs on the same computer.

Chapter 2

Product requirements

SignDoc Servers

This section describes the software that runs on a server and references to requirements for SignDoc Standard server and SignDoc Web server. Requirements that only apply to one component are indicated as such.

Specification	Description
Hardware	<p>A server class system is required to run SignDoc servers in an enterprise environment. The processing power of each physical server directly affects performance. As a minimum requirement, a quad core processor running at 2 GHz should be used.</p> <p>Memory: Minimum 16 GB RAM, recommended 32 GB.</p> <p>Freed disk space: Minimum 100 GB or more hard disk space.</p>
Accessibility	<p>1 GB network minimum, configured at full duplex, is required for this server and the database server.</p> <p>If the system is installed behind a firewall, HTTP or HTTPS ports should be open within firewalls that restrict client access across your WAN or LAN.</p> <p>Certain hardware is prone to networking issues when TCP offloading is enabled. If you experience frequent networking issues, or use a Virtual Machine (VM), disable TCP offloading. You must disable this setting at all levels, including the host operating for both the Virtual Machine and its host, and NIC; and all machines within the SignDoc server system including the database server. Refer to documentation from your vendor for instructions on how to disable TCP offloading.</p>

Specification	Description
Server Operating Systems	<p>We recommend that you upgrade to the latest operating system update for the following supported operating system versions.</p> <p>Microsoft Windows</p> <ul style="list-style-type: none"> • Windows Server 64-bit 2012 <ul style="list-style-type: none"> • Microsoft Mainstream support end date: Oct. 9, 2018 • Windows Server 64-bit 2012 R2 <ul style="list-style-type: none"> • Microsoft Mainstream support end date: Oct. 9, 2018 • Microsoft Extended support end date: Jan. 14, 2023 • Windows Server 64-bit 2016 <ul style="list-style-type: none"> • Tested version: Windows Server 64-bit 2016 Standard (1607) • Windows Server 64-bit 2019 <ul style="list-style-type: none"> • Tested version: Windows Server 64-bit 2019 Standard (1809) <p>Linux</p> <ul style="list-style-type: none"> • CentOS/RHEL greater or equal to version 6 <ul style="list-style-type: none"> • RHEL maintenance updates for CentOS 6 until Nov. 30, 2020 • RHEL maintenance updates for CentOS 7 until Jun. 30, 2024 • Ubuntu 18.04 LTS <ul style="list-style-type: none"> • Tested version • Canonical Ltd support until April 2023 • Ubuntu 16.04 LTS <ul style="list-style-type: none"> • Canonical Ltd support until April 2021
Web Servers/Web Application Servers	<p>SignDoc servers can be run on any Java EE server compatible with Java EE servlet version 3.1 or newer, and still under support by its respective manufacturer.</p> <p>The support of SignDoc Standard on Java EE application servers is limited to Tomcat, JBoss and WebSphere. Installation & deployment guide is available for Tomcat only. Please see the respective manufacturer's application server installation and deployment instructions for how to deploy Java EE .war files that use native code via JNI.</p> <p>Application Server</p> <ul style="list-style-type: none"> • Apache Tomcat 9.0.x (tested version: Apache Tomcat 9.0.17) • Apache Tomcat 8.5.x (tested version: Apache Tomcat 8.5.39) <p>Java runtime for application server</p> <ul style="list-style-type: none"> • Windows 64-bit: Java 11 • Linux 64-bit: Java 11 <div style="background-color: #f0f0f0; padding: 5px; margin: 10px 0;"> <p>Note In case of manual installation, make sure that JCE with "unlimited strength" is available.</p> </div> <p>Note also, SignDoc servers uses a native layer that must be made accessible for the JNI Classloader of SignDoc Standard via your Java EE server. Refer to your Java EE server documentation for how to make native libraries accessible. Usually, it is sufficient to add the native libraries to the system path.</p>

Specification	Description
DBMS (SignDoc Standard only)	Microsoft SQL Server <ul style="list-style-type: none"> • 2012 <ul style="list-style-type: none"> • Requires latest service pack and Microsoft Extended support (end date: Jul. 12, 2022) • 2014 (tested version: Microsoft SQL Server 2014 Express) • 2016 • 2017 (tested version: Microsoft SQL Server 2017 Enterprise) <p>Note For direct access to the database, SQL Server Command Line Utilities or Management Studio must be installed.</p> H2 DB <ul style="list-style-type: none"> • Supported for evaluation only
SMTP (SignDoc Standard only)	Using the email functionality, an SMTP server must be installed and/or accessible. The required SMTP configuration is dependent on the network setup for each organization, along with other factors. <p>Note Kofax SignDoc does not need to receive emails.</p>
Required 3rd Party Technologies	<ul style="list-style-type: none"> • Windows systems <ul style="list-style-type: none"> • Visual C++ 2008 Redistributable SP1 (x64) • Visual C++ 2017 Redistributable Package (x64) • Java Runtime Environment <ul style="list-style-type: none"> • Windows 64-bit: Java 11 • Linux 64-bit: Java 11
Compatible Software	Kofax Total Agility (using SignDoc Standard) <ul style="list-style-type: none"> • 7.6, 7.5 • 7.4, 7.3.0, 7.2.1 Kofax Communication Manager (using SignDoc Standard) <ul style="list-style-type: none"> • 5.2, 5.1 Kofax FraudOne (only SignDoc Web) <ul style="list-style-type: none"> • 4.3 or higher (via Kofax SignDoc Web 5.1 plugin version v3, see technical specification of Kofax FraudOne)
Languages supported	English
Virtual System	You can deploy SignDoc server components on VMs running on operating systems as specified above.

SignDoc Clients

This section describes what users need on the client side to create and maintain accounts as well as to create and maintain signing packages in SignDoc Standard. It describes also what users need to sign or review documents using SignDoc Standard or SignDoc Web.

Requirements that apply to all clients of a web application are summarized in the [General requirements](#) section. Particular requirements that apply only to individual components are listed in a separate section.

General requirements

This section describes requirements that apply to all SignDoc clients not operating on mobile devices.

Specification	Description
Hardware	<p>We recommend a standard office desktop computer with at least 2 GB of RAM (4 GB RAM is recommended).</p> <p>There are additional requirements for client applications when native handwritten signatures have to be captured.</p>
Browser (usage on desktop computer)	<p>Microsoft Edge</p> <ul style="list-style-type: none"> • Microsoft Edge (tested version: 42.17134.1.0) <ul style="list-style-type: none"> • Windows 10 <p>Microsoft Internet Explorer</p> <ul style="list-style-type: none"> • Microsoft Internet Explorer 11 (tested version: 11.0.9600.18792) <ul style="list-style-type: none"> • Windows 10, 8.1, 7 • Windows 7 SP1 requires Microsoft Extended support (end date: Jan. 14, 2020) <p>Google Chrome</p> <ul style="list-style-type: none"> • Stable channel (tested version: 73.0.3683.103; 64-bit) <p>Mozilla Firefox</p> <ul style="list-style-type: none"> • ESR Version (current version) (tested version: 66.0.4; 64-bit) <p>Safari</p> <ul style="list-style-type: none"> • Mac OS X

Specification	Description
Operating Systems	<p>We recommend that you upgrade to the latest operating system update for the following supported operating system versions.</p> <p>Microsoft Windows</p> <ul style="list-style-type: none"> Windows 10 Windows 8.1 <ul style="list-style-type: none"> Microsoft Mainstream support end date: Jan. 9, 2018 Requires Microsoft Extended support (end date: Jan. 10, 2023) <p>Note Windows 7 Enterprise/Professional/Ultimate Edition (32-bit/64-bit) requires Microsoft Extended support (end date: Jan. 14, 2020)</p> <p>Linux</p> <ul style="list-style-type: none"> Only x86/x64 <p>Mac OS</p> <ul style="list-style-type: none"> OS X

SignDoc Standard Manage Client and Administration Center

This section describes additional requirements and details for the client application to create and maintain accounts as well as to create and maintain signing packages using SignDoc Standard.

Specification	Description
Accessibility	We recommend an Internet connection capable of 100 Mbps.
Mobile operating system	<p>We recommend administrating SignDoc Standard via desktop computer.</p> <p>Note When using a mobile device for administration, we recommend a medium size device (tablets, 768 px and up).</p>
Languages supported	<p>GUI available in:</p> <ul style="list-style-type: none"> Dutch, English, French, German, Italian, Japanese, Portuguese (Brazil), Spanish

SignDoc Signing Client

This section describes additional requirements and details for the client web applications to sign or review documents. Deviations for the legacy SignDoc Web Browser Client are covered in the section [SignDoc Web - Browser Client](#). Requirements for the SignDoc Mobile App are treated in section [SignDoc Web - SignDoc Mobile client](#).

Specification	Description
Compatible Hardware	<p>For desktop computers, we support devices that are compatible with the supported browser technology and supported client operating system as listed below as well as 10 GB or more free hard disk space for installing software for native handwritten signature capture.</p> <p>For mobile devices, we support devices that are compatible with the supported mobile operating system as listed below using device default (standard) browser technology.</p> <p>Note On mobile devices, the handwritten signature capturing is supported with a minimum of HTML5 capture.</p>
Accessibility	<p>The browser-based signing clients require an Internet connection capable of the equivalent bandwidth of a 3G/LTE connection.</p> <p>Support mobile devices with mobile network or Wi-Fi network connectivity.</p>
Mobile Operating Systems	<p>Apple iOS</p> <ul style="list-style-type: none"> • iOS 12, 11, 10, 9 <p>Google Android OS</p> <ul style="list-style-type: none"> • 9.x, 8.x, 7.x, 6.x (tested version 8.1.0. 7.1.1) <p>Microsoft Windows OS</p> <ul style="list-style-type: none"> • Windows 10
Handwritten Signature Capturing (using browsers on desktop computer)	<p>Browsers referenced in the General requirements section are support at least for HTML5 handwritten signature capture.</p> <p>Microsoft Edge</p> <ul style="list-style-type: none"> • Capture of signatures will be done via HTML5 only <p>Microsoft Internet Explorer</p> <ul style="list-style-type: none"> • Native handwritten signature capture support via SignDoc Device Support <p>Google Chrome</p> <ul style="list-style-type: none"> • Native handwritten signature capture support via SignDoc Device Support • HTML5 handwritten signature capture is available <p>Mozilla Firefox</p> <ul style="list-style-type: none"> • Native handwritten signature capture support via SignDoc Device Support • HTML5 handwritten signature capture is available <p>Safari Browser</p> <ul style="list-style-type: none"> • Capture of signatures will be done via HTML5 only
Compatible Software (via browser on desktop computer)	<p>SignDoc Device Support (only for Windows desktop systems)</p> <ul style="list-style-type: none"> • 2.0.1 native signature capture via Google Chrome, Mozilla Firefox or Microsoft Internet Explorer 11 <p>Note SignDoc Device Support includes DeviceConnector and also the drivers for supported handwritten signature capture devices previously available with Softpro Driver Setup.</p>

Specification	Description
Languages supported	GUI available in: <ul style="list-style-type: none"> Dutch, English, French, German, Italian, Japanese, Portuguese (Brazil), Spanish

SignDoc Web - Browser Client

This section describes details for the browser client of SignDoc Web that differ from the SignDoc Signing Client. General requirements are listed in the section [General requirements](#).

Specification	Description
Handwritten Signature Capturing (via Browser on desktop computer)	HTML5 handwritten signature capture is only available for the SignDoc Web Browser client "mobile view".
Languages supported	GWT GUI available in: <ul style="list-style-type: none"> Dutch, English, French, German, Italian, Japanese, Portuguese (Brazil), Spanish

SignDoc Web - SignDoc Mobile client

This section describes the requirements for the SignDoc Mobile app. SignDoc Mobile is a client application for SignDoc Web.

Specification	Description
Hardware	1 GB RAM
Accessibility	SignDoc Web requires an Internet connection capable of the equivalent bandwidth of a 3G/LTE connection. Supported mobile devices with mobile network or Wi-Fi network connectivity.
Mobile Operating Systems	Apple iOS <ul style="list-style-type: none"> iOS 12, 11, 10, 9.3 Google Android OS <ul style="list-style-type: none"> 9, 8.x, 7.x, 6.0, 5.x (tested version: 8.1.0, 7.1.1)
Handwritten Signature Capturing	Native handwritten signature capturing
Languages supported	Available in: <ul style="list-style-type: none"> English

SignDoc SDK

SignDoc SDK enables the creation of applications that process SignDoc documents, rendering as images, signing, and verifying PDF and TIFF documents. It provides functionality to capture and verify handwritten signatures on mobile devices, or from specific USB signature pads. The technical specifications in this section are specific to SignDoc SDK 4.3.1.

This section provides the requirements for the following parts:

- SD SDK 4.3.1.4
- Foundations
 - Android 1.9
 - iOS 1.6.10
 - WinRT 1.1.1
- SignWare 3.2.9.0

SD SDK

SD SDK is delivered as 64-bit version and enables the creation of applications which process SignDoc documents, that is, rendering as images, signing, and verifying PDF and TIFF documents.

Specification	Description
Hardware	<p>System Requirement for Development</p> <p>Windows Microsoft Windows 10/8.1/7 (64-bit) Processor: Minimum 2 GB RAM, recommended 8 GB RAM 2 GB or more available disk space Additional disk space for development environment</p> <p>Linux Restricted to headless operations (no GUI and no GUI elements)</p> <p>System Requirement for Deployment 100 MB or more available disk space</p>
Software	<p>System Requirement for Development Java Development Kit (JDK) 11, 8 Visual Studio 2017 X code 10</p> <p>System Requirement for Deployment Windows systems</p> <ul style="list-style-type: none"> • Visual C++ 2008 Redistributable Packages • Visual C++ 2013 Redistributable Packages • VisualC++ 2015 Redistributable Packages • VisualC++ 2017 Redistributable Packages • Java 11, 8

SignAlyze

SignAlyze is a standalone application to visualize handwritten biometric signatures, compare them, and validate certificates associated with the document including the signature data. It is an interactive tool providing forensic experts additional information for signature analysis. The technical specifications in this section are specific to SignAlyze 1.8.0.

Specification	Description
Hardware	We recommend 1 GHz or faster, at least 1 GB of RAM and 500 MB or more free hard disk space.

Specification	Description
Client Operating Systems	<p>We recommend that you upgrade to the latest operating system update for the following supported operating system versions.</p> <p>Microsoft Windows</p> <ul style="list-style-type: none"> Windows 10 (64-bit) <div style="background-color: #f0f0f0; padding: 5px;"> <p>Note</p> <ul style="list-style-type: none"> Windows 8.1 (64-bit) requires Microsoft Extended support (end date: Oct. 1, 2023) Windows 7 Enterprise/Professional/Ultimate Edition (32-bit/64-bit) requires Microsoft Extended support (end date: Jan. 14, 2020) </div>
Required 3rd Party Technologies	<p>Microsoft shared runtime libraries:</p> <ul style="list-style-type: none"> Visual C++ 2008 Redistributable Packages Visual C++ 2013 Redistributable Packages Visual C++ 2015 Redistributable Packages Visual C++ 2017 Redistributable Packages
Compatible Software	<p>SignDoc Device Support</p> <ul style="list-style-type: none"> 2.0.1 native signature capture <div style="background-color: #f0f0f0; padding: 5px;"> <p>Note SignDoc Device Support includes DeviceConnector and also the drivers for supported handwritten signature capture devices previously available with Softpro Driver Setup.</p> </div>
Languages supported	<p>GUI available in:</p> <ul style="list-style-type: none"> English German

SignDoc Device Support

SignDoc Device Setup supports handwritten signature capture using external devices. It replaces the Softpro Driver Setup. The technical specifications in this section are specific to SignDoc Device Driver Setup 2.0.1.

Setup

The setup installs the SignDoc Device components.

Specification	Description
Hardware	We recommend 1 GHz or faster, at least 1 GB of RAM and 200 MB or more free hard disk space.

Specification	Description
Operating Systems	<p>We recommend that you upgrade to the latest operating system update of the following supported operating system versions.</p> <p>Microsoft Windows Client</p> <ul style="list-style-type: none"> Windows 10 (64-bit) Windows 8 / 8.1 <p>Note Windows 7 Enterprise/Professional/Ultimate Edition (32-bit/64-bit) requires Microsoft Extended support (end date: Jan. 14, 2020)</p> <p>Microsoft Windows Server</p> <ul style="list-style-type: none"> 2019 2016 2012, 2012 R2

Core - Device Connector, SignPad Driver, Touch & Pen Support

The Device Connector enables the web-based capture of handwritten signatures and images. The Device Connector is also required to retrieve certificates. SignPad driver components enable capture of handwritten signatures using WACOM devices and provide an access module for Windows integrated touch pen devices.

Specification	Description
Hardware	We recommend 1 GHz or faster, at least 1 GB of RAM and 200 MB or more free hard disk space.
Browser	Google Chrome Mozilla Firefox Microsoft Internet Explorer 11

Specification	Description
Client Operating Systems	<p>We recommend that you upgrade to the latest operating system update for the following supported operating system versions.</p> <p>Microsoft Windows</p> <ul style="list-style-type: none"> Windows 10 <div style="background-color: #f0f0f0; padding: 5px; margin-top: 10px;"> <p>Note</p> <ul style="list-style-type: none"> Windows 8.1 (32-bit/64-bit) requires Microsoft Extended support (end date: Oct. 1, 2023) Windows 7 Enterprise/Professional/Ultimate Edition (32-bit/64-bit) requires Microsoft Extended support (end date: Jan. 14, 2020) </div>
Required 3rd Party Technologies	<ul style="list-style-type: none"> Microsoft Visual C++ 2013 Redistributable (x86) Wacom STU Driver Manufacturer device drivers for interactive Pen Displays and signature pads without display.
